

PROJECT:

**Botany Bay, St. Thomas, USVI**  
**On-site Sales/ Reception Center**

In 2006, as an expedient way to develop an on-site presence, this double-wide office trailer was renovated and furnished with displays to create a sales reception center on the western tip of St. Thomas. The entry deck is designed in a manner to be least obtrusive of the terrific view over the Atlantic to the right and the Carribean to the left.

The display area displays artifacts discovered by the archeologist on the property. A custom mount was developed to maintain the integrity of the artifacts.

**DESIGNEATH**
